

# PLEASE HELP US PRAY FOR OUR DAUGHTER!

Our precious ten year old daughter, Cristina Hernandez, was diagnosed with Neurofibromatosis (NF1) when she was just six months old. She has three tumors in her brain and an eminent possibility of developing more.

Thankfully, through the prayers of many people and Our Lord's infinite mercy, she has been healed of the tumors she had on her femur bone and spine. Her doctor's at Children's Hospital can not explain how they disappeared but we can...a miracle!

We are amazed that since this prayer crusade began, not only have her motor skills improved, but her overall development has progressed at a much more regular rate than expected! We have been blessed that many of our prayers have been answered, but we still need you to keep praying until the remaining tumors in her brain & some other new medical developments as well this disease are gone.

Cristina and our entire family need your prayers more than anything else. We'd like to specifically request that you pray and ask God for the grace and gift of complete healing of this disease through the intercessory prayer of Blessed Mother Teresa.

Blessed Mother Teresa of Calcutta followed the example set by our Savior, and she invited Him to work through her. She remained focused on her love for Jesus and gave no thought to society's evaluation of her.

The Vatican has approved one miracle obtained through Mother Teresa's intercession. Mother Teresa was beatified on October 19, 2003 and needs only one more miracle for her cause of canonization. With this in mind we would ask that you pray for Cristina's healing through the intercessory prayers of Blessed Mother Teresa.

For updates on Cristina and to see more pictures, we would be honored to have you visit her website.
